Wanted: e-commerce integration assistance (Vancouver)

I am looking for someone who can assist with the integration of Wordpress, the GetShopped.org e-Commerce plugin, and Moneris financial gateway.

From my understanding, a script is required to integrate the Wordpress e-Commerce plugin, and Moneris. I would also like to ensure the Wordpress site integrated with Moneris is PA-DSS and PCI compliant.

If you can assist, please contact me and we can discuss compensation and time required.

thanks,
evan

Need Web Developer Help (Lower Mainland)

Need a web developer to help me on my many websites I own, developed and operate. Must have experience with html. Education is a bonus. E-commerce, seo, social media marketing and related skills and experience are an asset.

I'm not looking for a company as there are many cheap ones online. I am looking for a smart, young person to help my family web business and who wants to learn from a successful marketing and business professional - maybe a university student or grad, etc? I am willing to pay remuneration, and share my years of experience in marketing, SEO, web marketing, web strategy, business, etc, in a mentorship role.

Prefer a local person in Lower mainland who can work at their home or in my office in Langley.

Reply to this ad with your info and/or resume.

Technical Director - Fjord West (Yaletown)

Job: Technical Director
Location: Vancouver, BC
Status: Full-time, Permanent

Fjord West, a division of Cossette West, offers complete in-house interactive solutions for leading companies and organizations – a one stop shop for full-service e-marketing, design and development. By combining our communications savvy, spectacular design, usability expertise and technical strength, our products and services transform user interactions into profitable and rewarding relationships.

We are currently seeking an experienced Technical Director. Their role will be to manage a talented internal team, lead the development and quality assurance process, and work directly with our clients including McDonald's Restaurants of Canada and USA, BC Government, Tourism British Columbia, Ronald McDonald House Global Charities, Manitoba Telecom Services (Allstream) to name a few.

The ideal candidate should have at least 4 years experience in a similar management role, but have 10+ years within a role that exposes them to IT systems, websites and all aspects of digital marketing. Overall the candidate will be able to manage the technical development of all projects to a high quality, on time and on budget. The successful candidate will report to the Director of Production at Fjord.

Key Responsibilities

Leading and Managing the Technology Department

- Manage departmental resources day to day, including providing guidance and assistance, appraising progress, steering developmental approaches etc
- Act as a single point of contact between other keystones in the project process, essentially presenting a unified senior-level 'interface' to the Technology Team
- Coach developers in 'best practice' techniques
- Ensure adherence to technical standards once established
- Write precise, detailed and comprehensive specifications based on requirements gathering in accordance with our methodologies.
- Liaise with management and HR to carry out recruitment and selection, training and development, i.e. succession planning, internal movements etc.
- Liaise with senior management and HR to establish and maintain a coherent and effective performance management program
- Develop and maintain a quality induction program for the department
- Develop effective working relationships with internal 'clients' (specifically, senior management and department heads) and external suppliers

Providing steering in the Technical Direction of the Agency

- Develop relationships with key technical suppliers & vendors
- Determine facilities requirements (hardware, software, hosting) and devise and implement procurement programmes as required well in advance of project-specific requirements becoming apparent
- Watch and evaluate key industry trends and developments and recommend appropriate reaction
- Devise and implement a CMS partner strategy
- Prepare strategies for key web technologies, e.g. "appropriate use of", "risks associated with" etc
- Identify the measures necessary to ensure that Fjord is compliant with data protection and freedom of information legislation and to resolve any queries that may arise

Requirements

- Strong creative appreciation and an enabler to the creative and project management teams.
- Has worked in the digital industry for 10+ years
- Consultative experience in a client environment is preferable, as is a strong understanding of the

advertising/marketing industry.

- You should have demonstrable experience in quality control techniques at all levels of production from specification to deployment and maintenance.
- Good knowledge of the physical architecture required to present secure, fast and reliable web-based systems
- Ability to clearly communicate technical information in a way that can be comprehended by non-technical people
- Good and proven track record with data integration and handling
- Have an excellent breadth of online technologies knowledge, including experience in producing systems in .net, java, php, css, html, dhtml, xml and Flash Integration.
- Expert understanding of SEO
- Excellent understanding and experience in delivering web standard WC3 projects

To apply for this position, please visit the Careers section of our website at <http://www.cossette.com>

"Cossette is an equal opportunity employer and we invite women, visible minorities, persons with disabilities and Aboriginal people to apply."

<http://vancouver.en.craigslist.ca/van/web/1868540399.html>

iPhone App and Android App Developer Needed

We are currently seeking a young and talented software developer who can create an iPhone app, as well as an Android app for our online publication.

We would like the app to use our RSS feed to update the app. It does not need to be fancy, it just needs to update each story category properly.

You can check us out at www.goodnewsweekly.ca

Interested developers please submit a quote for this project, including ALL expenses anticipated.

<http://vancouver.en.craigslist.ca/van/web/1867782153.html>

Awning company requires individual to create shop drawings. Must have experience in the business

<http://vancouver.en.craigslist.ca/van/web/1867780632.html>

Junior Web Designer Needed

This is a full-time position to start immediately.

-- [CMDesign](#) --

Experience Requirements:

- * Minimum 1 year working experience with focus on web design and development

Skill Requirements:

- * Solid understanding of website usability
- * User-centered web interface design expertise
- * Expert with HTML and CSS
- * Working knowledge in Adobe Photoshop, Illustrator and Flash
- * Advanced knowledge on JavaScript coding
- * Skilled in resolving cross-browser related issues
- * Knowledge of backend coding/scripting a plus
- * Strong organizational skills and highly motivated with the ability to meet multiple deadlines in a fast-paced environment
- * Ability to function in an organized yet unstructured environment. Must work well independently, as well as part of a team

More info on [Vancouver Web Design](#) under Career tab.

No phone calls please.

We would like to thank all the applicants, in advance, for their interest in our company, however, only those selected for an interview will be contacted.

Web Designer for project (Vancouver)

We're seeking a multi-talented web designer that is a team member. Someone who questions convention and challenges conformity with their creative approach, yet also realizes the benefits of playing by the rules to ensure the best result for the client.

If you are a good fit for our team and can offer something valuable to our clients then we'd love to hear from you! If this sounds like your kind of gig, simply reply to this posting and submit your resume or website to us. You must be comfortable working for an agency and within deadlines.

This position would be for a per project basis and we need someone immediately. Once the contract is completed we would review your performance here and assess if we would like to continue with future projects.

We are boutique-sized, Vancouver-based, forward-thinking marketing group that is rapidly growing.

Please submit your website link for us to review your previous work.

Thank you!

<http://vancouver.en.craigslist.ca/van/web/1866697507.html>

Geospatial and Database Developer (Abbotsford)

i-open Technologies is expanding our Professional Services team. We are looking for an experienced, professional, highly motivated team player to deliver a superior customer experience. This position requires demonstrated competence in a variety of Geospatial and Database solutions, understanding of workflows and proven ability to analyze business processes. If you thrive to take part in the ever-evolving technology industry; aspire to work in a positive, fulfilling, flexible and growing environment; then you may be a great fit for our team!

Reporting to the Director, Professional Services, you will be initially responsible for:

1. Strategizing geo-web tool use and function

Work with team to come up with creative ways to display and interact with complex geographic data sets. This will require collection and analysis of client requirements; provision of technical prototyping/walk-throughs to ensure software meets business requirements; evaluate new software and technology and make recommendations regarding its use

2. Design and development of Web user interfaces for new and existing web based projects

Create innovative and appealing web sites using industry standard methods

3. Developing custom software tools for use in geo-web environment

Custom design web-based geospatial visualization tools; provide testing and quality assurance processes for software

4. Documentation

Document all methods used to create geo-web visualization tools for future maintenance and updates; document roll out procedures and strategies for software; creation and maintenance of functional and technical design documents, as well as some general business analysis

5. Supporting and Troubleshooting Geo Web Applications

Provide technical support; investigate and resolve production problems; optimizing geo web systems

6. Coordinating and Communicating with project manager and other IT and non-IT department resources.

Excellent verbal and written skills and a strong, problem-solving orientation

Technical Qualifications:

- BS/MS Computer Science/Engineering or GeoSciences (or equivalent)
- In-depth knowledge and proven experience using related programming languages (Javascript, .NET, AJAX, Python, PHP, HTML, DHTML, XML) to develop geospatial tools
- Fluency with MS Server OS and Web Platforms (other OS/Web Platforms beneficial)
- Database management and programming skills (SQL Server, Oracle)
- GIS experience with ESRI ArcGIS and Autodesk Map/MapGuide products
- Proven Experience developing in geospatial web based platforms (Google Earth API, Google Maps API)
- Fluency with Geospatial data formats and standards (vector and raster)

Must-have Attributes: Demonstrated ability to effectively organize and prioritize workload

- Strong business acumen with analytical ability to assess the business and technology to help drive the organization forward
- Progressive system development experience, developing high-volume, high availability systems
- Team player with desire to develop into management position Excellent communication skills High level of initiative

Please submit cover letter and resume

CSS/HTML Wordpress Developer (Vancouver)

Short and Sweet - We are looking for a CSS/HTML Wordpress Developer (Or ninja as some would say!!)

- * NO RECRUITERS OR FREELANCERS/COMPANIES
- * MUST BE WILLING TO WORK FROM OUR OFFICE IN VANCOUVER
- * MUST SEND LINKS OF PORTFOLIO
- * MUST HAVE A GREAT PERSONALITY

<http://vancouver.en.craigslist.ca/van/web/1866259837.html>

Entry Level Flash Contractor (Vancouver)

Our company sells digital marketing and social media solutions including Facebook, mobile and Twitter apps to major brands in the U.S. and Canada including Abercrombie & Fitch, Hyundai, Starbucks, St Louis Rams and McDonalds Restaurants.

We are looking for a contract person to provide Flash based user interface for our web and Facebook applications. The successful candidate will have a solid understanding and experience working with Flash as well as a good understanding of user interface, design and usability.

While this is an entry level, contract position, the company is looking to expand the role and the amount of work based on the success of initial projects. Our company is growing fast, we are working with some of the world's leading brands so this is an excellent opportunity to learn and work on cutting edge applications.

Most of the creative is provided by our clients or their agency, however candidates will be required to connect graphics and pre-designed pages together in an effective interface. Good design instincts, excellent Flash programming capabilities and the ability to create good user interface and usability is important.

The successful candidates will work from our offices in downtown Vancouver.

User Interface Design Superstar (West Broadway)

[Mingleverse Laboratories](#) is an award-winning startup based in Vancouver, BC. We have built the world's first virtual telepresence communication service.

We are seeking an experienced user interface designer to help take the look and feel of our system to the next level. We have built a fantastic platform and we want it to look and function as beautifully and as intuitively as possible.

This job requires excellent user experience sensibility with an eye for graphic design and a flair for innovation. Programming experience and a programmer's knowledge of Adobe Flash Actionscript is also desired. Our team is small and we want to keep it that way, so you will be required to work across several different aspects of the system ? from the web front end through to aspects of the desktop applications. The main focus will be on the Adobe Flash components -- where the heart of our user experience lies.

This is a true Silicon Valley-style startup opportunity: with all the energy, intensity and rewards that comes with making a start up successful. If you are creative, knowledgeable and persistent and want to make a serious contribution to our team and revolutionary technology, then come join our small but talented group. This is a fantastic opportunity for personal growth and to take your skills to the next level while working closely with management with a proven success record.

Essential:

- ? 3-5 years of user-interface design and/or development for digital media software products, games and/or online services (with reference portfolio)
- ? 3+ years of digital graphic design experience (with portfolio)
- ? 3+ years of web/HTML/CSS design experience
- ? Familiarity with Adobe Flash
- ? Post-secondary qualifications in design, digital media development or related area
- ? Canadian residency (this is really important)
- ? Desire to work in a small-team startup company workplace

A real plus:

- ? Programming experience in Adobe Flash ActionScript 3.
- ? Digital audio/video editing & production experience
- ? Team software development experience under agile methodology
- ? Mobile UI Design experience (Apple iOS, Android, etc.)

ColdFusion Web Developer Wanted (Gastown - Vancouver)

Web Developer/Programmer

Rapidly growing, Vancouver based company seeking part-time web developer/programmer with potential for full-time work and plenty of room for advancement for the right person.

About Us:

We are a web services company catering exclusively to sports organizations. We seamlessly integrate unique and professional website designs with our web-based sports content management. Our suite of tools allows sports organizations of all sizes to have a high-end web presence with virtually no knowledge of web development. From integrated online registration and fee collection to detailed statistics, photo albums and online stores, we provide all of the best the web has to offer to sports organizations. Our offices are located in Gastown in Vancouver, BC. Visit us online at esportsdeskpro.com.

Responsibilities:

Successful candidate will develop new features and work to improve our current offerings. Other aspects of the job may include customer service and support including maintenance of support forums.

Qualifications: At least 4 years experience developing with ColdFusion, CSS, HTML, and Javascript
Knowledge of MySQL, MS SQL Server, XML, AJAX, Linux, and PHP
Excellent English written and verbal communication skills
Ability to manage time well and work independently
Please forward your portfolio, resume and compensation expectations to jobs@esportsdeskpro.com, with subject "Web Developer/Programmer".

We are looking to add a new member to our office staff, please do not apply if you are not interested and able to commute to Vancouver. Only those selected for an interview will be contacted.

User Interface & Interaction Designer (Downtown Vancouver)

As a leader in Customer Experience Management software, ResponseTek is offering a unique opportunity to join an innovative and highly motivated software as a service company. Located in downtown Vancouver, ResponseTek provides a great working environment with great employee benefits.

ResponseTek enables Global 2000 firms to increase revenues and profits by building advocacy and dramatically reducing customer defection. As the global leader in Customer Experience Management (CEM), ResponseTek's hosted software solutions help organizations continually improve their ability to deliver on the customer promise by delivering up-to-the-minute, front-line customer experience information to their key decision-makers. We pair excellence in technology with a firm dedication to developing our people.

We are looking for a User Experience and Graphic Designer to join our dynamic team.

Summary

The User Experience and Graphic Designer is responsible for providing user interface design as part of our product development process and supporting the delivery of projects throughout their lifecycle.

Reporting to the Product Group Director, the User Experience and Graphic Designer is the expert at ensuring all online interfaces, both in our online products and on our public websites, are well designed, visually appealing, and easy to use.

The ideal candidate must possess strong graphic design and user experience design skills, a collaborative and positive attitude, willing to work with a wide range of stakeholders from developers to senior management.

Key Responsibilities:

The Interaction & Usability Designer role will have the following responsibilities:

- Development of user interface mockups and storyboards
- Production of wire frames and building of interactive prototypes for demonstration
- Assisting in defining use cases, functional requirements and specifications
- Support of UI design throughout the product lifecycle
- Provide design and support for the corporate website, working closely with marketing
- Bringing best practices and new opportunities forward with respect to online user experience.

Knowledge, Skills, and Experience

The ideal candidate will bring the following knowledge, skills, and experience to this position:

- 2+ years experience in user interaction and interface design with web-based applications.
- In-depth knowledge of web languages including HTML, DHTML, CSS, JavaScript, JSON, AJAX, and Flash.
- Good understanding of web browser standards and browser capabilities and limitations for main-stream browsers.
- Experience designing and supporting websites
- Strong graphic design capability using Photoshop or similar tools.
- Comprehensive understanding of usability and interaction design
- Excellent written and oral communication skills
- Proven ability to work in a team environment
- Ability to communicate with different personality types and roles (e.g., development, sales, support, customer) effectively and build strong relationships

<http://vancouver.en.craigslist.ca/van/web/1855907523.html>

Web Designer (Richmond)

Richmond Internet Development company is looking for Web Designer

who has minimum 3 years experience in web design with skills in html, css, javascript, jquery, adobe cs graphic, video and etc.

The successful candidate will work with our marketing team and development team to develop ecommerce and internet marketing applications

This is a full time job required to work at our Richmond office.

Outsourcing companies or freelancers need not apply.

<http://vancouver.en.craigslist.ca/rch/web/1855896771.html>

Looking for talented, fun web guru (Vancouver)

We are a young, vibrant start up looking to round out our team. If you're a jack-of-all-trades cowboy coder, a crack HTML maestro or anywhere in between, you could be the person for us. We're looking for someone with at least a few of the following 5k1llz:

- * HTML design, hand-coding and templating of CMSs.
- * A very high level of Actionscript 3 and an intimate knowledge of the flash runtime and Eclipse / Flex Builder build environment.
- * PHP, from the ground up.
- * Drupal development and hacking. (Ubercell development a plus)
- * Java web services.
- * Red5 video distribution. Media transcoding at a guru level.
- * Android development.

Still there? A bit about us. We're a small team of designers, coders and marketing wizards dividing our time between a growing business in online sales and an ambitious, world-changing re-invention of internet communication and curation. As a part of our team, you'd be pushing your skill level working on big chunks of both. A few things:

The good:

- * An intimate, creative work environment. Your input and creativity is valued and necessary!
- * Work from your home office or ours. Set your own hours.
- * You'll have the autonomy to invent things and take the time to do them right. No cookie cutters.
- * No clients. All our work is in-house and for the greater benefit of ourselves, the internet and the world at large. All the projects/people that we work with are tied and linked to our business/concepts and idea's

The bad:

- * Money's tight right now. Although we're on the verge of a big launch that will bring in cash, right now we probably can't pay you what you're worth. That said, this is not a freebie gig and we'll keep you fed. Also, for the right person, we can come to a part-time arrangement to work around your freelance career.

We are launching multiple business that are already bringing in Cash flow
If your the right person, you'll help boost it and get paid better than any dinky job that your not really passionate about or didn't have any involvement in building.

- * We need someone local to Vancouver for at least weekly face to face meetings and brainstorming.

So who's out there and up for a challenge? Make sure to send us at least a few online examples of cool stuff you've worked on, with a breakdown of your part in the project. We look forward to hearing from you!

Ps: We are not kidding when we say we are working on a re-invention of the internet. We've developed a fractal based, real-time multimedia collaborative platform that is going

to change how information is exchanged and perceived. Period. We don't put out ads often. We are in-house, know people kinda guys. This is a rare opportunity to be a part of a company that is going to revolutionize the world. Why?

Because we are passionate. Because we care. And because we can't be bought out.

Ready for an adventure?

<http://vancouver.en.craigslist.ca/van/web/1855796861.html>

DRUPAL DEVELOPER WANTED (van)

looking for a Programmer who is well versed in Drupal and able to customize themes and plugins. We are creating a social network style site and are looking for a developer to create the site. Please reply with your portfolio and any pertinent information about your skillset.,

<http://vancouver.en.craigslist.ca/van/web/1855495421.html>

Front End Web Developer

Are you looking for an exciting challenge within a dynamic, people-oriented culture where you can launch your technical career?

MMX Software Inc. is a technology consulting company, located in Vancouver, BC, that designs, develops, and delivers real-time interactive applications accessed via the Internet as well as back-end tools to support these applications. MMX provides a combination of out-of-the-box and customized solutions to an expanding list of partners and customers.

POSITION SUMMARY

The candidate will be responsible for building websites and software web pages related to internal and Partner-facing development projects. They will interface with stakeholders on a number of teams including Marketing, Graphics, Project Management, Web Development and Quality Assurance.

You will be part of a team of experts that is responsible for translating graphics and user interface elements into code to allow users understand the unique features and promotions that our company offers by:

- Transforming mock-ups / wire frames / content into accessible and standards-compliant web-applications that display correctly in all modern browsers
- Developing, maintaining and debugging static and dynamic web pages using Microsoft Visual Studio
- Coordinating with other developers for specialized scripts and complex functionality pieces
- Coordinating with Marketing and Graphics to build landing pages, promotions and marketing websites
- Attending technical meetings and meeting with project stakeholders to understand requirements and identify specific tasks
- Providing rapid prototyping for analytic user interface concept designs
- Providing user interface design improvements such as reusable page / screen templates, widgets, code snippets, etc.

ESSENTIAL SKILLS/QUALIFICATIONS

- 2+ years experience with Microsoft Visual Studio using C# and ASP.NET to produce web-applications.
- 5+ years experience designing, developing, updating, and maintaining Web sites and pages.
- 5+ years experience with the use of HTML, DHTML, CSS, Javascript, Adobe Illustrator and Adobe PhotoShop
- Deep understanding of browsers, platforms, compatibility, accessibility, and usability issues. Must be able to address HTML and scripting compatibility issues between different browsers and computing platforms.
- Experience in creating and maintaining websites based on content management systems
- Experience utilizing various types of IT project methodologies and life cycles, including Agile.
- Excellent written and verbal communication skills are required
- Self-starter who takes initiative, requires minimal supervision, can handle multiple tasks at the same time
- Demonstrated ability to develop, manage, and complete deliverables within specified time frames
- Effective team player with the ability to work independently
- An appreciation of end-user needs and requirements with ability to see the big picture

* Knowledge of appropriate usage of the latest versions of Flash ActionScript as well as ASP.NET would be beneficial

MMX Software provides an opportunity to work with a skilled and supportive team of experts, the ability to drive your own success. If you are interested in this position, please apply online at www.mmxsoftware.com.

If your a social media junkie - you might just love this job!

Short term part time temporary position - forward cover letter (resumes not required) to email provided

<http://vancouver.en.craigslist.ca/rds/web/1855211135.html>

Web and Social Media Content Specialist (5-month contract) (Surrey)

Web and Social Media Content Specialist (5-month contract)

Contract, Full-time Temporary, (5 months)

A major B.C. company is seeking a smart, creative, Internet-savvy individual, who knows how to bring messages to life online, both in traditional web page and social media environments.

As our Web and Social Media Content Specialist, you will put your social media, web development and writing skills to work, advancing our company's reputation in online communities, and seeking to increase traffic to our social media profiles and website. Working closely with the Internet Communications Manager, you will help build and maintain our company's online presence, through social media channels and our company websites. You will work with our Social Media Committee, and other members of the Communications team, to identify opportunities for supporting overall Corporate and Marketing Communications strategies through online content development.

This position is full-time temporary (40 hours per week), and located at our Surrey office. (Offsite is not an option).

Please submit your application package by Friday, July 23 at 4 p.m. by responding to this ad with:

- Your resume
- A cover letter that states
 - your expected hourly pay rate
 - how your experience can support our needs
- Samples of your writing (print and/or web)

Additional Information

Responsibilities

Working within our Marketing and Communications department, key responsibilities for this role include:

- working closely with the Internet Communications Manager to research, write and publish content for our company's websites
- working closely with the Social Media Committee as well as with internal company stakeholders to develop and maintain online content
- developing, implementing, and measuring success of social media plans to increase our visibility and communications with target audiences
- understanding communications and brand objectives and ensuring ongoing social media strategy is aligned with overall strategies
- identifying opportunities for web and social media, and contributing to development of campaigns for these channels
- monitoring social media trends, tools and applications and applying that knowledge in developing and tracking social media initiatives

Qualifications

- a degree or diploma in communications, journalism, new media or public relations
- at least 2 years of demonstrated experience with online communications and social media technologies
- public relations experience, with demonstrated success in developing and implementing successful media campaigns (including social media)
- knowledge of social media tools and techniques, which you maintain by personally participating in social media channels
- excellent written and oral communications skills in English (samples required)
- knowledge of web publishing platforms, HTML and multimedia software such as Photoshop is an asset but not mandatory.
- experience with content management systems (CMS)
- organization and planning skills to manage multiple projects and deadlines
- great interpersonal skills and a positive attitude a must

Web Graphics Designer (Downtown Vancouver)

Web Graphics Designer

Cymax Stores Inc. is one of the Top 150 E-tailers worldwide and was recently nominated by the Internet Retailer as one of the Hot 100 2010 Best Retail Websites. Simply put – we sell furniture, with 120 niche web stores and over 250,000 products for home and office furniture and décor. Cymax Stores is located in Vancouver, B.C. and sells to customers all over North America. Our growth since our launch in 2004 has been exponential and our culture at Cymax is unique: every person plays a critical role.

Cymax is looking for a Web Graphics Designer to join its fast-paced marketing team. The Web Graphics Designer must be able to perform a wide variety of graphic design tasks, but is mainly focused on creating site banners and email blasts. In addition, the Web Graphics Designer is also required to produce printed material such as flyers, as well as some web interface design from time-to-time. Some HTML and CSS would be a definite asset. This is a junior to intermediate role perfect for a talented individual who is looking for an opportunity to grow and learn with a company.

Job Description:

- Work with marketing team, including email marketing manager and copywriters, to produce graphics for weekly email blasts.
- Create promotional banners for our web sites.
- Produce main site page graphical images (e.g. home page, brand pages, category pages) within a set template.
- Create external advertising assets, including site banners and required print ads.
- Produce printed assets, included in-store signage, flyers, mini-catalogs and business materials.
- Work with existing staff to build mockups and prototypes, establish and create style guidelines and style guide documents as project deliverables.
- Implement designs in HTML and CSS, with the assistance of a WYSIWYG editor, as required.
- Ensure consistent brand message and visual image through all channels.
- Be a positive contributor to team environments.

Job Requirements:

- Minimum of 2 years in experience in internet and web design. Familiarity with print design.
- Completion of a recognized graphic/web design program, accompanied by a solid portfolio of design work and understanding of copy/design integration, typography and web interface design.
- Excellent communication and talent for multi-tasking and juggling multiple priorities.
- Proficiency in Adobe Creative Suite, including Photoshop and Illustrator, preferably on a PC.
- Experience producing print materials and creative assets, including understanding print requirements and working with a professional printing service provider.
- Working knowledge of HTML and CSS.
- Strong conceptual and creative skills.
- Commitment to customer satisfaction.

If you are interested in this opportunity, please send your resume and cover letter to: careers@cymax.com. Please be sure to include Web Designer in the Subject line.

Please also include a link to your online portfolio.

SEO Specialist - Jr. to Mid-Level, Full-Time Position (Vancouver / Yaletown)

We are posting this for a second time for increased exposure before shortlisting. If you applied previously, no need to re-apply as we have your information on file and you will be considered.

POSITION SUMMARY

The successful applicant will be a well-rounded, technically competent web specialist who can participate in the execution of our SEO strategies in order to increase the visibility of our clients' online resources.

DUTIES

- Develop and execute link building strategies including negotiating link acquisitions, blog post & article placement (guest blogging, sponsored posts, etc.), basic link development (directories, comments) and targeted link requests.
- Develop, monitor and report on key performance indicators, projections and performance analysis.
- Work across multiple areas in our organization in order to track, optimize and develop our clients' SEO strategies.
- Act independently when new projects are started to ensure that search benefits are optimized.
- Review trends and web analytics to provide recommendations for areas of focus as they relate to SEO, then execute those recommendations.
- Work closely with our writers to ensure full search value is being realized through the content properties.
- Continual monitoring and execution of SEO efforts on all controlled websites to increase search traffic and visibility.
- Execute keyword research and report findings.

ESSENTIAL SKILLS/QUALIFICATIONS

- 0-4 years' experience with SEO with proven ability to develop strategy and achieve results.
- Working knowledge of HTML, CSS, CMS (Wordpress) and an understanding of HTTP server headers.
- Strong knowledge of web analytics tools (Google Analytics primarily and/or Omniture Site Catalyst).
- Ability to communicate effectively with various groups such as web developers, marketing personnel, and business clients.
- Proven ability to work in a fast paced environment and deliver on multiple tasks with tight deadlines.
- Self-directed and a self-starter.
- Inquisitive and results focused approach.

ADDITIONAL ASSETS

- Up to date on trends in SEO.
- Experience with marketing automation software (Eloqua, Marketo, Sales Fusion, etc.).
- Experience with B2B or lead generation websites.

This is a fulltime, in office position with flexible hours.

Please send your cover letter, resume and salary requirements to careers@salesworks.com.

We are posting this for a second time for increased exposure before shortlisting. If you applied previously, no need to re-apply as we have your information on file and you will be considered.

Technical Development Lead (Vancouver)

We are the up and coming Web 2.0 startup in Vancouver, having raised funding from prominent angels a few months ago and now moving across North-America quickly. We are the winner of LaunchPartyHQ's LPV8 People's Choice Award and Top 3 Businesses of New Venture BC's Fusion Forum. Our team is expanding rapidly and we are looking for winners to join our team.

We are looking for a technical entrepreneurial-minded leader, with strong development (PHP Framework) skills, to help us optimize and grow our business. You should love to write code, and solve problems but if you also have an eye for user experience, SEO optimization and A/B testing - all the better. This is a hands on, collaborative role, and you will be a part of a winning team creating an exciting new application that will change the world - the wedding world at the very least!

You will join us in the exciting Yaletown new office - a laid-back, fun and rewarding working environment with tons of learning opportunities. Recent graduates with a strong web 2.0 portfolio are encouraged to apply!

Your experience & skills:

- A degree or diploma in Computer Science or related field
- 3+ years of web application development experience with PHP Framework
- Solid SQL knowledge and experience building scalable database driven web sites
- Experience using open source software and services
- Knowledge of JavaScript and AJAX required
- Familiarity with SEO, landing page optimization, A/B Testing, web analytics required
- Mastery of cakePHP or similar MVC framework
- Basic sysadmin skills for linux-based deployments
- Sound project management and communication skills

Who you are:

- Passionate about web technologies, usability, and agile development
- Motivated self starter / entrepreneurial spirit / excellent communicator
- Business-sense / solutions-focused / loves learning
- Scrappy and entrepreneurial; you love iterating and shipping quickly and frequently
- You're innately driven to create web applications that users love

What we need from you:

- Architect, implement (code), and maintain our online platform
- Provide overall technical guidance, ideas, and leadership
- Use your tech savviness to solve business problems and create cost-efficient business opportunities
- Troubleshoot user issues and improve user experience as quickly as possible
- Own the quality, through unit testing, regressions and other automated and manual testing of your code
- Provide estimates, communicate tradeoffs and work with the CEO to make the right decisions for the business
- Help grow our company by hitting aggressive deadlines and responding to customer needs

Why Join Us?

Great opportunity to get in on the ground level of a promising company, lead technology development, and use your skills to make a mark!

We Want to Hear From You!

Please direct all inquiries and resumes to angel.pui@weddingful.com. Please include links to previous projects!

Web & Performance Analyst (Vancouver)

WEB AND PERFORMANCE ANALYST

Contac Services Inc. is Canada's largest direct marketing, print and fulfilment company specializing in personalized 1to1 communications that build brand and customer loyalty. Originally founded in 1978 as a third party logistics company for the travel industry, Contac expanded its services to become the only single-source solution in North America to seamlessly create, produce and deliver personalized 1to1 marketing.

Today the company provides the highest quality production, lowest cost and fastest distribution of marketing collateral to major brands around the world. Headquartered in Vancouver, B.C., Contac has facilities in Toronto, Montreal and London. Our goal is to continue to develop and expand both our Company and our people. We are currently seeking a Web and Performance Analyst to join our Vancouver based team.

Reporting to the Marketing and Communications Manager, the Web & Performance Analyst is a senior consultant role that provides expertise in web analytics and directly supports the Executive, IT and Marketing management teams. The position will provide value added analysis and recommendations through the development, interpretation and analysis of web site reporting. This will include, but is not limited to:

- Weekly web site and performance reporting
- Recommendations for site optimization
- User visit and traffic path analysis
- Transaction, conversion, abandonment and lead generation and management
- KPI tracking and reporting
- Client satisfaction

Key Responsibilities:

- Issue weekly reports and provide insight and recommendations
- Analyze web performance to improve conversion rates
- Create and maintain benchmark reporting for case study analysis
- Measure/report impact of web activity on ecommerce activity
- Determine and track user lifecycle and value of web user
- Provide analytical and decision support to key decision makers internally and externally
- Develop, monitor, and report on key performance indicators, projections and performance analyses
- Liaise with IT, marketing, web developers and other members of the web production team to implement enhancements and new services
- Assist with planning and testing platform upgrades (i.e. new PURL or transactional improvements)
- Other duties as assigned

Experience and Area of Study:

- 3 - 5 years experience managing content or production for high-traffic websites
- Minimum 2 years using web analytics tools (i.e. Google Analytics, Omniture Site Catalyst and other tools)
- Member of Web Analytics Association
- Bachelor's Degree or equivalent work experience

Skills:

- Facilitation and presentation to senior management
- Ability to provide multiple team support while completing tasks in a timely and professional manner
- Leading change initiatives and marketing case support
- Business to consumer web site focus
- Vendor evaluation and recommendation (web analytic tools)
- Developing data management processes
- Ability to mentor others in web site analysis

This is a full time, 8:30 am to 5:00 pm, Monday to Friday position but will require flexibility to work on call, unusual hours or extended shifts when necessary.

Desire to thrive in a competitive environment, this position offers a competitive compensation and benefits package. If you describe yourself as a team player, enthusiastic, possess a high level of integrity and the willingness to make a significant contribution, we invite you to apply for this opportunity.

Please send your resume as well as salary requirements to careers@contacservices.com

To find out more about Contac Services, please visit www.contacservices.com

Web Designer/Developer (Yaletown)

Programmers Unite Inc.

Looking for web designers/developers who don't want their skills getting old while waiting for the perfect fulltime or consulting job.

Our company looks for great projects which require skilled web designers to help take the project to the next level, which in many cases will bring in the necessary financing.

The projects are broken down into modules and then programmers that are selected can accept the module to complete for Unite dollars in that project/company.

Like any entrepreneur your Unite dollars will only be worth something if the project is successful and/or receives financing.

Best part is web designers can be part of a couple projects which if successful they will be the first to be selected from to grow the successful applications.

Many of the projects may require skills that you have always wanted to learn but have never had the direction, we will supply the requirements.

We understand people need money but they also need to keep their skills a high level in order to compete, this will afford the proper candidates to increase their skillset with a chance at being part of the next great application.

Good creative programmers are the secret to unleashing the next Facebook or Twitter.

If a job comes up feel no pressure about moving on.

Skills that are being looked for:

Skill Levels: Students --- Experts

- * Understanding of CSS for mobile app design (ie.Iphone,Android)
- * Adobe Creative Suite 4 (i.e. Dreamweaver, Fireworks, Photoshop, Flash, Media Encoder, Illustrator and InDesign), Acrobat and Flex
- * Html, Javascript, jquery, CSS, XML, PHP
- * Can produce highly impressive creative in a timely manner
- * Brilliant design and layout skills for both web and print media
- * Able to collaborate with team members as well as work independently on projects
- * A solid understanding of web usability, interface and user experience
- * Excellent attention to detail
- * Excellent written and oral communication skills

Apply to below link.

Heaven.com Sr Web Developer Opportunity! (Downtown Vancouver)

Please apply to <http://hire.jobvite.com/j/?cj=oCGIVfwi&s=Craigslist>

Web Developer
Reinvent Technologies

Company Profile

Reinvent is a company that is about taking an idea, making it a reality and building it into something great. As a private online media and advertising company that owns and manages one of the largest portfolios of internet domains in the world we are committed to developing this virtual real estate with these ideas into independent businesses through our lab or incubator model. One of our first developments in progress at our downtown Vancouver offices is Heaven.com!

What is this position all about?

This opportunity is about amazing code and a passion for developing something greater with Heaven.com. We are looking for a very skilled Web Developer to code a new web platform and applications. Social media experience and the thrill of building something from scratch are definitely a great addition to this role.

What will 'accountabilities' look like for the Web Developer?

- Architect and develop a completely new cloud-based e-Commerce platform.
- Take creative ideas and turn them into elegant and functional code that you have no hesitation to revisit, rework or omit.
- Learn new languages and/or development processes quickly
- Be excited at the opportunity to exercise your creativity in a rapid prototyping environment that changes direction.
- Utilize your skills in user experience to create frictionless functionality

What do you need to have in order to be ready for this opportunity?

- You are a really smart engineer
- A passion for developing sites like heaven.com
- B.S. in Computer Science or a related technical field
- Web development experience using MVC framework
- Excellent experience, knowledge, and perspective around social commerce, cloud architecture, with prior platform development and e-commerce infrastructure development being a big plus.
- Solid communication skills
- Fundamental understanding of programming languages such as PHP, Python or Perl with bonus points for C++ skill
- Unix and Linux proficiency
- Knowledge of and experience working with relational databases
- Strong experience with CSS, HTML, JavaScript/AJAX

Submissions

Please provide a link to one or more websites that clearly illustrate your capabilities in addition to your resume and cover letter when applying.

Where will you be working?

We have a really sweet office in downtown Vancouver with views of the harbour, north-shore Mountains and downtown area that some would pay money to see (and it's the perfect downtown location for commuters).

This role comes with a comprehensive and competitive benefits package.

We really appreciate all applications and if you're selected for an interview, we will be in touch.

Looking for Graphic designer who understands HTML/CSS and Usability (British Columbia)

I am looking for graphic designers who make simple websites which are easy to navigate. They must also be pleasing to the eye.

The designer should understand the limitations of HTML/CSS, but will not be required to create the templates. Deliverables will be done in PSD/AI unless you are comfortable creating the HTML.

Usability and Wire framing will be a huge asset.

Compensation will be determined by quality of previous work. Please include a portfolio instead of a resume.

Web partner seeks a iPhone App developer partner (Vancouver)

Hello there,

I am looking for a partner who has experience building iPhone apps.

I have a web site that is about 4-5 days far from a launch, which has taken me about 1 month of full time work.

I am interested in having someone join me and help me with an iPhone app.

We can negotiate a profit-sharing model which I am confident will work for both of us. I own several sites and I've had some success, but am interested in taking this to the new level.

You must have experience with:

- Using geolocation in iPhone
- Using SOAP web services via iPhone
- Have some interest in new ideas and are tired of the Web 2.0 buzz

Looking forward to hearing from you!

Cheers

Looking for Web Design Help -- CSS Website. (Kitsilano)

I am an inexperienced web designer looking for help putting a website design into code. I have a working practical and logistical knowledge of html, a limited knowledge of css, and extensive graphics and computer knowledge. I am attempting to build a website in html and css (using a stylesheet), but my limited understanding of css is handicapping me. This job entails nothing more than some tutoring. I am by no means asking you to write this website for me. I am working entirely in Dreamweaver and Photoshop, so knowledge of these programs is a requirement.

If you are interested, please email me with an hourly rate and/or any further questions about this job. I can email you a copy of my design so you can see what it is that I am trying to do and determine whether or not you have the expertise to help me. This design requires only css and html and is by no means out of the ordinary in scope.

Thanks.

RFP - Website Redevelopment

Burnaby Men's Soccer Association (BMSA)
Request for Proposals – Website Redevelopment

The Burnaby Men's Soccer Association is in the process of redeveloping its website and creation of a new logo. We currently have a website designed and are looking to re-engineer the site to update its appearance, better reflect the priorities of the Burnaby Men's Soccer Association and to incorporate the latest web technology.

The Burnaby Men's Soccer Association is a member organization of approximately 700 players. Our main website users include: team managers, individual players, league officials and the Executive Board of the Association.

Key components that are required in the redevelopment of the website are:

- League Schedule
- League Standings and Statistics and Discipline Reporting
- Online Registration of Players
- Individual Team Pages
- Displaying League Information and upload/download templates of League Forms
- Email Communication
- Ability to export registration information for the British Columbia Soccer Association (BCSA)
- League Executive to have Administration Options

Please visit the current site at www.bbysoccer.com for further examples of information required.

The BMSA requires the redevelopment of website to be completed in time for the Fall/Winter Season of 2010-2011. The successful contractor will be required to have the work completed by September 1, 2010.

Bidders must provide a quote, detailed experience and examples of similar work performed.

The deadline for response to this Request for Proposal is July 26, 2010. Only successful bidders will be contacted.

For further information please contact bmsa@shaw.ca . No phone calls please.

<http://vancouver.en.craigslist.ca/bnc/web/1845694839.html>

Junior Software Developer

We are a startup company working to revolutionize the way people interact with connected displays and tablet devices from smartphones. If you are a new or recent university or college graduate looking for a challenge and the opportunity to work with a high calibre team, we have an opening for a talented junior web services software developer.

Responsibilities and Requirements

- Design, implement, and test web services applications using the LAMP Stack and PHP
- Development experience with MySQL, JSON, REST, JavaScript, and CSS/HTML
- Familiar with Linux system environment, and development tools including SVN and Bugzilla
- Able to work independently, self motivated, and comfortable working with limited requirements
- Experience with mobile application development an asset

The ideal candidate is one who can work independently with little or no supervision to come up with innovative and creative solutions to challenging issues.

Agents or agencies will not be responded to.

<http://vancouver.en.craigslist.ca/van/web/1845651586.html>

F/T Data Maintenance Associate (Richmond)

Are you passionate about cars?! Do you often find yourself talking about cars with your friends? Are you currently driving in your car? If so, please pull the car over, because this opportunity might be right for you!

An online retailer specializing in the automobile sector is looking for a meticulous Data Maintenance Associate to take on the full responsibility of importing and maintaining product specifications, pricing information, and other data from multiple resources into our system. Data could be sourced out from either handwritten documents, documents readily available in Excel file or other digital format, the World Wide Web, or printed catalogues. The Data Maintenance Associate will also be responsible to search for, edit, and otherwise adjust product images to a pre-defined format based on existing workflow and procedures, using Adobe Photoshop as the editing software. Intermediate level of knowledge and experience with Microsoft Excel is a MUST and a related training certificate would definitely be an asset. Basic training with Adobe Photoshop will be provided onsite if needed.

Key Responsibilities

- Receive and register documents for data, Enter data according to specified format(s), Transfer data between software packages, Verify the accuracy and completeness of data, Update and maintain databases, and Perform general office duties.

Knowledge and Skills:

- Proficiency working with SQL Server Management Studio and basic T-SQL programming (mandatory)
- Languages: Speak English, Read English, Write English. Nice to be fluent in French
- Reading text, Document use, Numeracy, Writing, Oral communication, Working with others, Problem solving, Critical thinking, Finding information.

Business Equipment and Computer Applications:

- Windows OS, General office equipment, Electronic mail (Microsoft Outlook/Microsoft Mail/Web Mail), Microsoft Excel 2003 and higher, Microsoft SQL Server Management Studio, Internet Browser, Adobe Photoshop.

Education:

- Post-Secondary degree or diploma

Terms of Employment:

- Full Time, Permanent.

Please include job title and salary expectations in cover letter and resume.

Junior - Intermediate Graphic Designer (Yaletown)

QuickMobile is a leading mobile application solution provider helping organizations in the Travel and Entertainment Sectors "mobilize" their business. Our solutions improve the user's mobile experience, drive incremental revenue, marketing ROI and brand loyalty. The company is small but funded and managed by people with an exciting vision who have years of experience growing successful technology companies. It's an intimate, fast moving culture yet it allows your voice to be heard and your creative ideas to be realized.

We are looking for a talented, imaginative and multi-faceted Graphics Designer/Developer to drive the creative design, implementation and testing of our mobile applications commercial website and mobile services. We like to work with people who can think outside of the box.

Key Responsibilities:

- Provide design and graphic elements for both web applications as well as mobile smart phone applications
- Work closely with both mobile client developers as well as web application developers in delivering total solutions
- Provide guidance and recommendations in procuring appropriate tool chains for graphic development
- Implementation and maintenance of a number of dynamic and interactive web and mobile-based projects
- Code optimization for speed and compatibility
- Work within project management schedules to meet deadlines

Required Skills:

- 3+ years demonstrated development experience in UI design in both web and mobile spaces
- Strong skills in graphic design with a portfolio as evidence of experience
- Strong skills with Photoshop and Illustrator
- Superior knowledge and hand coding ability with HTML, CSS, and JavaScript.
- Proficiency with cross-browser/cross-platform issues, DOM and W3C web standards
- Experience with Flash or ActionScript a bonus
- Familiarity with multi-media (audio/video/images) encoding issues and related technologies
- Ability to hand code without WYSIWYG editors is required

To Apply: Please send a cover letter and resume, in confidence, to Stephanie Farenhorst, HR Manager at stephanie.farenhorst@quickmobile.com

Web Developer (Vancouver)

We are currently looking for a Web Developer. As the Web Developer, your primary purpose will be to develop, implement and maintain web-based applications. You will work with the IS Business Systems Analyst to translate user requirements into systems design documentation. Based on systems design documents, you will program, document and test code and/or assist in configuration, integration and implementation of 3rd party application software.

Education & Experience:

- Post secondary degree or certificate in Computer Science or equivalent
- 5+ years experience with .NET and object-oriented programming
- 3+ years working in a SQL Server environment having experience in stored procedures, database design and creation, views, scripting, replication, UDF functions, DTS, SSIS
- Experience working with XML, XPath queries, JavaScript, CSS and XSLT
- Knowledge of and experience in supporting financial accounting systems a plus
- Experience in developing on the SALESFORCE.COM platform a plus
- Experience developing data warehouses, Crystal Reporting and Business Intelligence systems a plus

Attributes:

- Proven track record of delivering on time
- Strong understanding of SDLC methodologies
- Strong customer service orientation
- Excellent communication skills in English both written and verbal
- Excellent analytical and problem solving skills
- Keen attention to details and quality
- Proven organizational skills
- Experience working in a team-oriented, cross-functional & collaborative environment

Please note this is a one year contract

Data Support Analyst/Marketing Applications (Vancouver)

About Colliers International

Colliers International delivers real estate services globally through 15,000 specialized professionals in more than 480 offices in 61 countries. Colliers provides advice for clients on over \$53 billion in transactions annually and manages in excess of 2.4 billion square feet with revenue reaching \$2 billion.

At Colliers International, we are committed to accelerating the success of our people and our clients. Our most valuable resource is our people: energetic, innovative thinkers who care equally about doing great work and developing a culture that's great for all our employees. We offer competitive compensation, unparalleled professional development and a generous host of benefits as part of our effort to keep Colliers a motivating, healthy, and productive place. Our employees come together with a wide variety of skills and backgrounds to create talented teams.

Purpose of Position:

We are looking for a Support Analyst to join our Vancouver office. The successful candidate will be responsible for delivering support to end users in the usage of business systems efficiently and effectively to fulfill business objectives. This includes troubleshooting applications and software for all internal customers with a focus on marketing and online applications but not excluding other business units/departments in Canada. The Support Analyst is also responsible for assisting in the deployment, delivery and improvement of future business applications, training programs and related courseware.

This role will part of the Canadian business systems team. The successful candidate will collaborate with other Colliers regional leaders, Global IT and with assigned business line(s) to assess, research, and analyze business, technical and system needs in order to resolve issues by recommending technology solutions that meet sponsor/stakeholder needs.

The incumbent is expected to understand and support strategic goals and/or objectives of the company's initiatives ensuring every effort is made to accomplish the initiative within approved time frame, scope and budget.

Summary of Essential Job Functions:

- Investigate user problems and needs, identify their source, and determine possible solutions.
- Maintain the integrity of data in selected applications including the corporate website
- Participate in the development, implementation, installation, and testing of applications including the corporate website
- Provide support for applications and classroom computer equipment used to conduct training and workshops
- Participate in the development of training materials and assist in conducting training and workshops in parallel processing and use of large computer systems.
- Investigate, recommend and install new applications as directed
- Maintain confidentiality with regard to the information being processed, stored or accessed by the network
- Document problems and resolutions for future reference
- Provide on-the-job training to new staff members
- Other duties as required

Required Skills:

- Education in Information Systems/Technology setting
- Basic understanding of online technologies, and content management systems for web
- Strong background in client and customer services with confidence and career experience with application support, problem solving, troubleshooting, technical investigations, solution recommendation, and resolving client needs within pre-established SLA's
- Ability to deliver excellent customer service at all levels of the organization and with external partners.
- Possess strong organizational, time management and project management skills with a demonstrated ability to work both independently and within a team environment.
- Ability to communicate clearly and concisely, both orally and in writing.
- Advanced skills in Microsoft Office applications (MS Word, Excel, PowerPoint and Outlook).

Exhibit a high level of professionalism and excellent interpersonal skills
Strong relationship-building ability, proactive, results-oriented, and resourceful.
Ability to meet deadlines without compromising accuracy, excellent product quality and attention to detail.

To Apply:

Please reference Job ID: 2010-026 and send detailed resume and cover letter to
Canada.careers@colliers.com.

Looking for Web Developer/Programmer who have knowledge of E-Commerce

Looking for Web Developer/Programmer who have knowledge of E-Commerce and process strong skills of PHP, MYSQL, JAVASCRIPT and AJAX to develop/upgrade an already existing fully functional ajax web 2.0 website to add e-commerce features, forums, faqs, and paypal user subscriptions. The existing site is a chatroom developed using html, ajax, php and mysql. I have the full source code to the existing site as well as technical documentation. The page validates as standards-compliant html with zero errors and the javascript has gone through a code validator as well. The chatroom is currently up and running and now I want a full website to wrap around the game. I want to increase the production values, add new features, upgrade some of the art, and design a good looking website to hold the chatroom and offer paid subscriptions and memberships.

Looking For SEO Person (Surrey)

Website URL : www.thediscountperfume.com

Keyword Request : perfume , discount perfume, and more.....

Currently : discount perfume - ranking on page 4th

Looking to see if anyone can help our perfume shop company increase the traffic, and we get to share the profit generate from the website.

- Last year December, the sales was around 6000 a month, but then We hire someone to do the seo, somehow, the traffic drop and the sales keep drop. That guy does not know what is he doing.

- I am looking for someone who can bring back the traffic and generate the sales. Compensation will be 10% of the sales, which if you can bring the traffic back like last year.

You did get 600 dollar a month and on going. if I find the right person. I can show the sales report.

Seriously inquiry only.

Are you a Jack (or Jill) of all trades? (Vancouver BC)

Hello,

Looking for a well rounded individual that can do it all. You have a great balance between left and right side of your brain but lean towards the creative. You like to explore new avenues but can also keep a project on track.

You're very comfortable with ASP.Net, CSS and SQL and can code with the best (or emulate the best very well). You also have an eye for graphics; you know what works and where to get it (and if you can't find it, you can create it from scratch). You've dabbled in Flash and know when to use it. You can create forms in your sleep and know how to validate and secure them (to today's standards), dynamic data isn't a problem or is creating and tweaking a basic sql database. You understand marketing, impactful customer contact and love using technology to achieve this. You've probably used DWeaver, FWorks, PShop CS3 or 4 or better but you're more concerned with the end than the means when it comes to your finished creation. Constant improvement is your mindset and the freedom to do this is like air to you.

If this is you, this may be your opportunity to shine.

Compensation commensurate to experience. Employee or Contract option. Plus on-going bonus opportunity for the right individual.

Please email resume (no birth dates or SINS please) with web portfolio. Only those candidates that seem like a fit will be contacted.

Working remotely is an absolute option. Preference will be given to those with a demonstrated ability to produce results unsupervised.

Full-Time Web Designer/PHP/MYSQL Programmer Developer (Vancouver)

Vancouver-based Online Wellness Company looking for Full-Time Web Designer/PHP/MYSQL Programmer.

This is a full-time contractor position for 35 hours a week at \$25 an hour to start.

After a 3 month trial period we will perform a review and if applicant has excelled within their tasks, they will be rewarded with an increase in pay.

Programmer must be well versed HTML/CSS/FLASH programming and implementation, as well as skilled in PHP/MYSQL programming with a minimum of 2 years experience and/or recent computer science graduate.

Applicant will be able to step into an already fully functioning environment, analyze current programming and database structure and be well-prepared to build upon and develop new content for the website.

Ideal applicant is innovative and up to par with all current web formats and functionality.

Applicant will be able to willing to split their time between working at a downtown office and at home. Ideally three days a week at home and two days at the office. Programmer must be willing to work within normal work hours (Example - 9:00 to 6:00 weekdays).

Required skills

Extensive experience/knowledge HTML/CSS/FLASH
Extensive experience with PHP and MySQL , CSS and JavaScript
Extensive knowledge of phpBB
Experience developing and working with custom CMS systems
Online video development an asset
Experience with various browsers and systems - Mac and PC and Mobile Aps
Experience working with and developing Web 2.0 functionality
Strong web design and page layout skills
Good knowledge of Photoshop and web optimization for graphics
Ability to take direction, accept constructive criticism, and meet deadlines
Desire to work in a close-knit team environment

Most importantly, applicant must be reliable and be able to keep deadlines. This is a must.

Please email your cover letter and resume and we will contact you to set up an interview. We are not looking for offshore developers or part-time contractors.

Only local programmers need apply.
