## Rapita assists hunt for next generation engineers

York, UK, 16th June 2010

Rapita Systems Ltd and the University of York have joined forces to offer a number of unique doctoral research opportunities.

Candidates are currently being sought for two projects on the EngD in Large Scale Complex IT Systems programme:

Timing validation and verification of critical systems

Probabilistic timing analysis

Designed for recent university graduates and candidates with several years of professional experience, both are sponsored by Rapita Systems in association with the University of York.

## **Step back in time with RapiTime**

York, UK, 20th May 2010

Rapita Systems Ltd has unveiled the latest version of its RapiTime measurement and analysis of real-time embedded software tool.

Combining the proven data collection, measurement and analysis techniques of previous versions with new features means RapiTime v2.3 takes timing analysis of real-time embedded systems to a higher level.

New features to support execution time measurement, code coverage and worst-case execution time analysis include:

## **Introducing the Rapita Systems blog**

York, UK, 29th April 2010

A new way to learn about and discuss software and real-time embedded systems verification and development issues - that's the promise for visitors to the Rapita Systems blog launched today.

Every week you will see a new post on a burning software topic written by a Rapita Systems specialist. The first, on how memory caches can slow systems down, comes courtesy of Dr Antoine Colin, a founder and Director of Rapita Systems Ltd.

Follow the issues and discussions yourself at:

<http://www.rapitasystems.com/blog/1>
